"nothing loth."
Mr. Walsh proposed [in his satirical way] to substitute the names of Nicholas F. Wilson, C. Dovelin, and Edm. Fowler, baker, sail maker, and carpenter, of your City, for Walworth, Coiller and Worden. Mr. Bascom wished to leave out Coiller's name and insert John Du-

which to leave out Collier's name and insert Join Duer's, as being very intimately acquainted with commercial law; but the most remarkable speech of the week was made by Mr. Balcom.

He rose and stated, that SIX HUNDERD CAUSES which have been argued before Chancellor Walworth are actually get undecided by him—he had withheld his decision in all of them—those causes (so I understood him to say had been argued three years.) and if Mr. Walworth does not keep at work, and do up the business of his Court, the whole of these 600 causes will have to be argued over again before other Judges, of course at groat cost, and much farther delay to the unfortunate suitors—but, added Mr. Balcom, as it is pretty well.

MELANCHOLY SHIPWRECE—Loss of Life.—Capt Wright, of the brig Joseph Balch, arrived at Bostan on Wadnesday from Barnstable, and states that a passenger from Truro, whose name he does not recollect, informed him that the bark Cactas, of Kennebunk, Capt. Nason, which sailed from Boston last Sunday morning for Cork and a market, laden with grain, went store near Truro, on Monday evening during the Northsat gale, and that all on board perished. Capt. Wright was also informed that a brig from Wilmington, N. C. for Boston, was shore near Truro. The above information is confirmed by a slip from the Yarmouth Register. The Cactus was a fine bark of 260 tons, one or two years old, and was loaded by Messra E. D. Brigham & Co. Agents for the Stoam Flour Mill at East Boston. Sho had a cargo of flour, core, corn meal, &c. which is belawed to be insured in New York. The vessel is insured for \$20,000, equally divided between two offices in Boston, and another office has \$2,000 on her freight monay. Our correspondent at Constantinople informs us that the Sultan has just ordered the abolition of the Slavepointing Reuben H. Walworth, Alvah Worder, market. He writes under date of Jan 20:

"Last Saturday the Sultan attended a session of the and John A. Collier, Commissioners to reduce the incomprehensible jumble and jargon called Law, into inters and high functionaries were present. The Sultan tem, order and common sense, and to surange it as a then took the first step of a measure which cannot fai to excite great attention in Europe : he ordered the supand David Graham, Commissioners to reform the intriof Slavery, it is true, but it is the first step toward that cute deceitful, and dishonest system of practice and end; and humanity must applaud the disappearance of pleading in the Law Courts, whereby so many millions that revolting establishment, where the victims of this have been extracted from the pockets and means of the have been extracted from the pockets and means of the honest and industrious.

These appointments the Senate made, because they are commanded by the new Constitution to appoint the most suitable persons to perform those duties, and not from any inherent love for reform and improvement that appears in the majority of its members, who are practising attorneys, thriving, or accumulating wealth, by the deservedly odious system which the Convention was called together to amend or change. There was a way of fulfilling the law, by evading its true intention, and choosing men avowedly hostile to the improvements contemplated—and the Senate chose Mr. Collier, whose friendship to codification we have never heard mentioned—it also chose Mr. Alrah Worden, who to the verification for the contemplated of the first three contemplates. infamous traffic were publicly exposed for sale, and which was daily the scene of the most degrading outdeed, it recommends the emancipation of a slave as a Museulmans to do, on occasion of a family festival, or ly. He will doubtless attend the Auti-Slavery anniversary in this City in May,

DWELLINGS OF THE LABORING CLASSES .- We ave received a copy of a bill, reported in the Senate on Monday last, incorporating Robert B. Minturn, Horatio seph B. Collins, Stewart Brown, Frederick S. Winston, and such others as shall be associated with them, as an Association for Improving the Dwellings of the Laboring Classes in the City of New-York.

The capital stock of this corporation is fixed at \$100,-000, in shares of \$100 each; the business is to be managed by seven Directors, to be chosen annually, each shares he owns. The object of the Association, as expressed in the bill, is "the building houses for the occupation of the laboring classes, on such improved plans as shall more fully secure health, convenience and com-

ced at this movement, and trust that it been exhibited in this State, should have had the mis-fortune to select Representatives who could thus act, is a subject of deep and lasting regret.

We talk of popular government, freedom, and elec-tive institutions—what a burlesque upon these our pre-sent Senate districts are, and not less so the Senators! One district, the 6th, is two hundred and forty miles may be wisely carried through. The advantages which will flow from it can hardly be estimated. In the first place, there is no doubt that capital invested in buildnient habitations under one roof, will meet with a profitable return. Secondly, the tenants will get much more comfortable dwellings than they now occupy at a less rent. They will also be free from the exposure to dis-case incidental in so many cases to their present wretched abodes. They will thus not only be elevated in the scale of respectability, but their children will be more healthy and vigorous, and as a consequence less liable to fall into vicious courses. From these considerations we do not see how any person endowed with only ordinary humanity can avoid taking a warm interest in the experiment contemplated by the proposed Association, if we would free the City from such plague-spots as the decent residences within the narrowest means. Let the wealthy and benevolent come forward in such associations and provide buildings, and see that suitable regulations with regard to their cleanliness and order are enforced, and they will lay the foundation of a sure amelioration for all the lower classes of society, and thus gradually dry up some of the most fruitful sources of vice and of untold expense and lojury to the public.

TESTIMONT AGAINST CASTE.—Rev. Ebenezer Davies, an Independent or Congregational Clergyman, and who for seven years past has been a Missionary of the London Missionary Society to the Emancipated Slaves of New-Amsterdam, County of Berbice, British Guiana-recently visited this City. Before leaving Guians, he bill may be improved, though really just now the case seems hopeless. I think I see a wheel within a wheel in this.

Land Limitation—Freedom of Waste Lands.

Mr. Hadley presented a petition for the freedom of the public lands, and there have been several others lately. Mr. Van Amringe, whom I had never seen before, lectured on this subject last night at the Capitoi—he speaks with force and energy—understands his subject well, and possesses that sincere, emphatic carnestness of manner which is so useful to a public speaker. He was listened to attentively by about 200 mechanics, and heartily cheered. What are the Committee, Mesers, Alling, Allaben, Watsen, and Develin about? Their report is very slow in coming.

In Senate, Mr. Harris had the \$12,900, reported by Mr. Wright as salaries to the Judges, changed to \$6,400 in the Appropriation bill, which was passed.

Tyrannical Post Office Law.

Mr. Lester, with great justice, introduced a Resolution which would greatly improva that of Mr. Thomas Smith, for it denounces as impolitic, unjust, and appressive, Mesers. Polk, Marcy, Ritchie and Walker's tyranical and barbarous law, to prevent the people, under a penalty of fine or imprisonment, from inclosing one or more letters to different persons under one cover, though residy and willing to pey the proper postage. Such a law was never before proposed, enacted, or put in force in any civilized country, or in any age of the world—Such a stretch of arbitrary power, even Scroggs, Jefferies, Dariton and Robesplerre never dreamed of.

Coples of the following bills are herewith transmitted, viz.:

1. A bill, in Senate, to incorporate R. B. Minturn, Horalo Allen, &c. as an "Association for improving the dwellings of the laboring classes in the City of New York." had heard through the English press of the prejudice which in this country assigns to the people of color separate seats in houses of worship. The practice of Rev. Dr. Patton's Church in particular had been re-vealed in the letter originally published by Rev. Mr Page, who occupied the Doctor's pulpit during his recent visit to England. The account seemed so incredible at Guiana, that Mr. Davice was urgently requested to investigate the matter on his arrival here; and he promteed, if he could find the 'negro pew,' that he would visit it and give his friends a description. Accordingly, on Sunday morning, the 21st inst. Mr. D. accompanied by his wife, attended religious services in Dr. Patton's Church, and took their scats with the colored people, as a testimony against a practice which he regarded as at war with the principles of the Gospel. An occurrence so unusual, as might have been expected, attracted considerable attention.
